# Sustainable travels

– FOR BETTER HEALTH, WALLET AND ENVIRONMENT

## Sustainable travels

Sustainable travels is a collaboration project with eleven organizations in Västernorrland County, in mid-Sweden. The main focus is our employees' business travels and their journeys to and from work.

Over a period of three years, our organizations spend 50 million euros on business travels alone. Moreover, the carbon dioxide released from our vehicles have devastating effects. Therefore, a revision of how we travel is a long-term investment for health, economy and the environment.

In each of our organizations, project leaders in mobility management works together to reduce our carbon footprints, to inspire and educate employees to make better travel choices.

**Together we can create a better future by reducing our emissions, and work towards healthier personnel and a better economy!**

### PROJECT GOALS

- Reduce CO<sub>2</sub> emissions from our commuting and business travels

### Did you know

- 47 % of our employees have five kilometers or less to work

HÅLLBARA  
RESOR

### PROJECT NAME

Hållbara resor/Sustainable travels

### EU PROGRAM

European Regional Development Fund

### SIZE OF EU GRANT

2,3 million euros (50 %)

### DURATION OF PROJECT GRANT

August 2015 - february 2019

### LEAD PARTNER

Region Västernorrland
