

A PART OF THE EU PROGRAMME INTERREG SWEDEN-NORWAY

SMICE

Samskapande Mittnordisk Innovationsarena för Cirkulär Ekonomi

SMICE

PROJECT INFORMATION

- SMICE is a network that works for a more sustainable society. Everything done in SMICE is based on the needs of the participants, with the goal of seeing more sustainable ideas become reality. SMICE is a cooperation between Norway and Sweden in the regions of Trøndelag, Jämtland and Härjedalen.
- SMICE supports the development of Circular Economy, the vision to minimize residues, waste and utilizing natural resources more efficiently. When we share, borrow, rent & upgrade value is created without spending resources. Circular business models are based on collaboration and innovation and open opportunities for development of both existing and new corporate ideas. The idea is to create a coherent platform where all the initiatives for sustainable and circular development meet and grow together.

PROJECT OBJECTIVES

- The aim of SMICE is to facilitate various engagements that contribute to more sustainable regions - ecological, economic and social. This by supporting innovative ideas from vision to action. This film summarizes the project and its purpose in three minutes: bit.ly/2xC0WU8 Also read more at www.smice.nu
